

# StorePoint\_Presetup\_3.0.EN (Delegate) - FUT

25 november 2016

10:13

## Module description:

StorePoint\_Presetup\_3.0.EN

## Test environment:

### Host:

Server: dtpset24-NT4003.ikeadt.com (Windows 7 x86, Windows 7 x64, Windows 2008 R2)

Till: dtpset13-if0003.ikeadt.com (Windows 7 x86, Windows 7 x64, Windows 2008 R2)

Client: DTPSET13-WS0001.ikeadt.com (Windows 7 x86, Windows 7 x64, Windows 2008 R2)

### Account:

SYSTEM

### Dependencies (hard):

AD-joined computer.

### Destination path:

%programfiles(x86)%\Storepoint\_Presetup

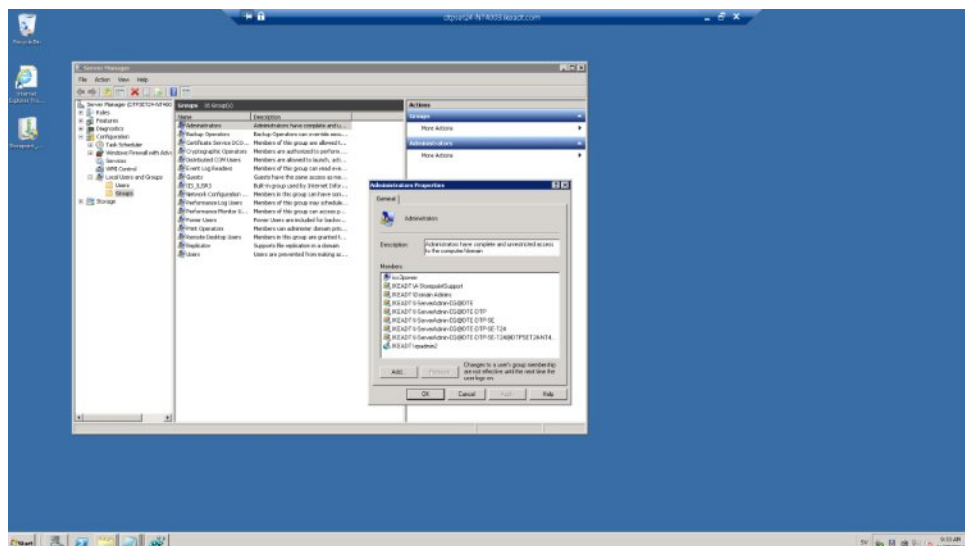

## Functional Unit Tests (FUT):

1. Set Local Admin permission

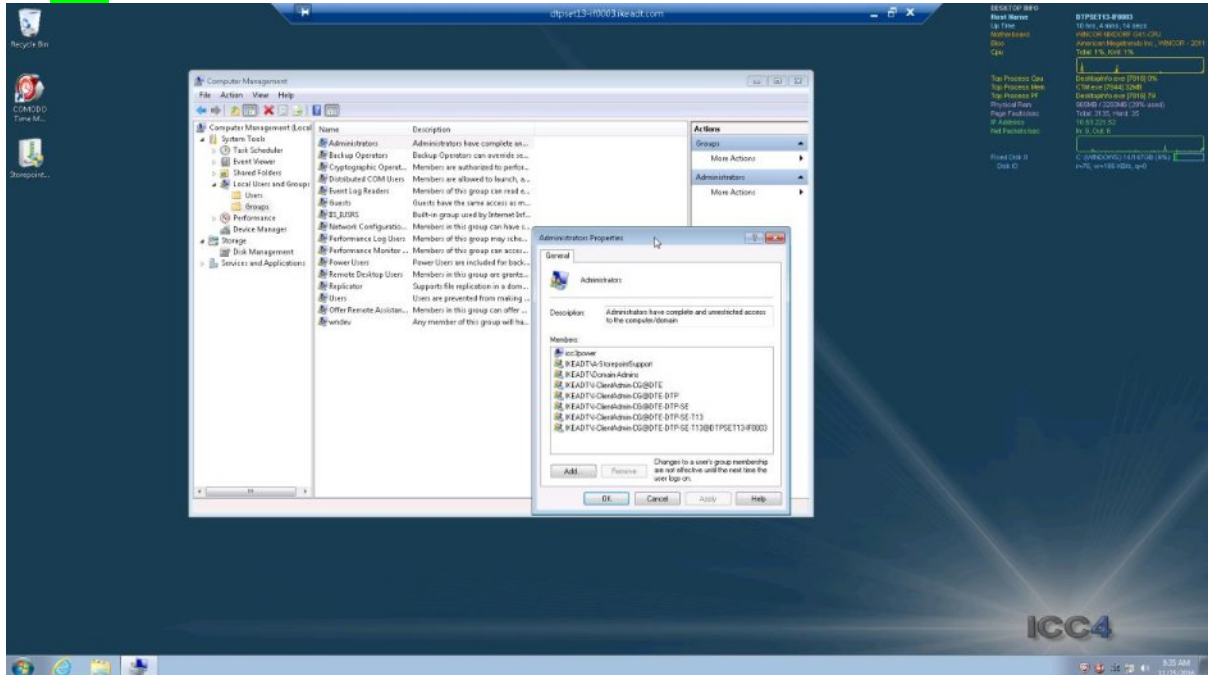

Run the binary Storepoint\_Delegate.exe -Add

Verify the group A-StorepointSupport is added to the local group Administrators

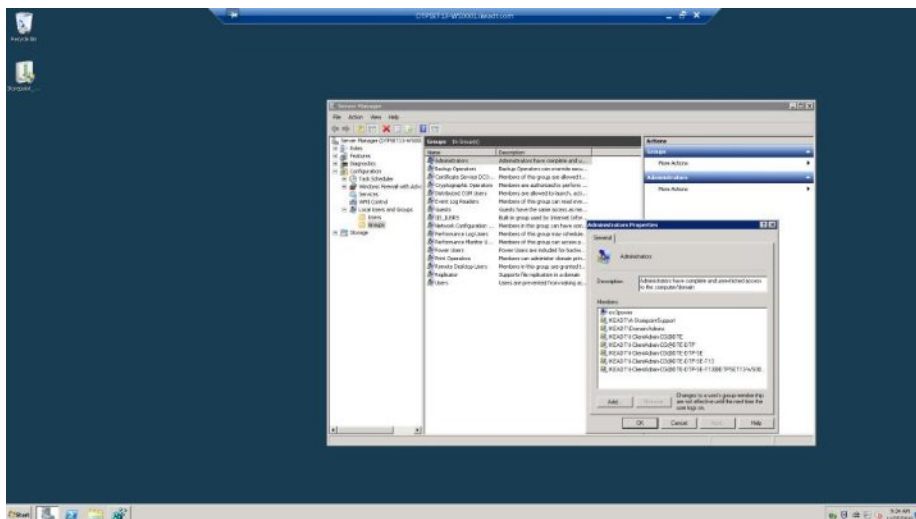

Server: Pass

Till: Pass

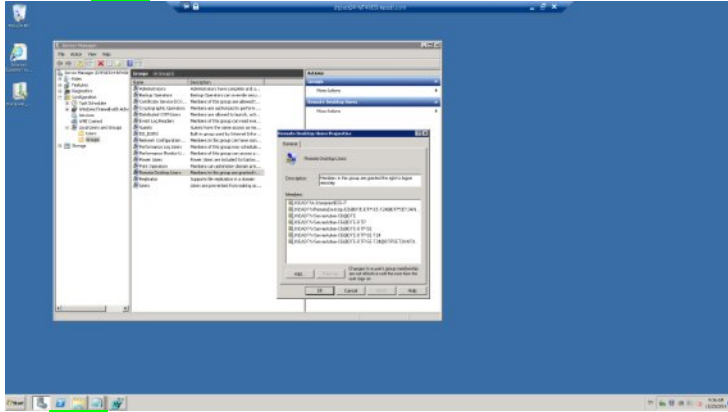

Client: Pass

2. Set Remote Desktop permission using GeolD  
Set the alias REG\_GeolD to Italy (&h76)  
Run the binary Storepoint\_Delegate.exe -Add  
Verify the group A-StorepointBOS-IT is added to the local group Remote Desktop Users  
Verify the group is only changed on -NT machines.

Pass

Pass

# Pass

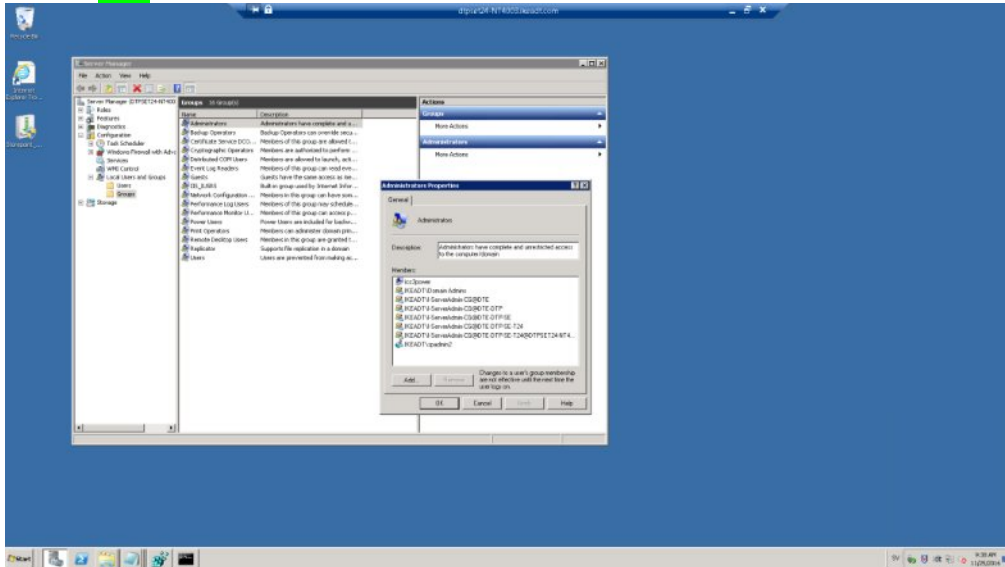

- Set Remote Desktop permission based on computer name (can only be verified in production)  
Clear the alias REG\_GeoID and sync it to the computer  
Run the binary Storepoint\_Delegate.exe -Add  
Verify a group A-StorepointBOS-XX is added to the local group Remote Desktop Users where XX is based on the country letters of the computer name.

Will be verified in PROD

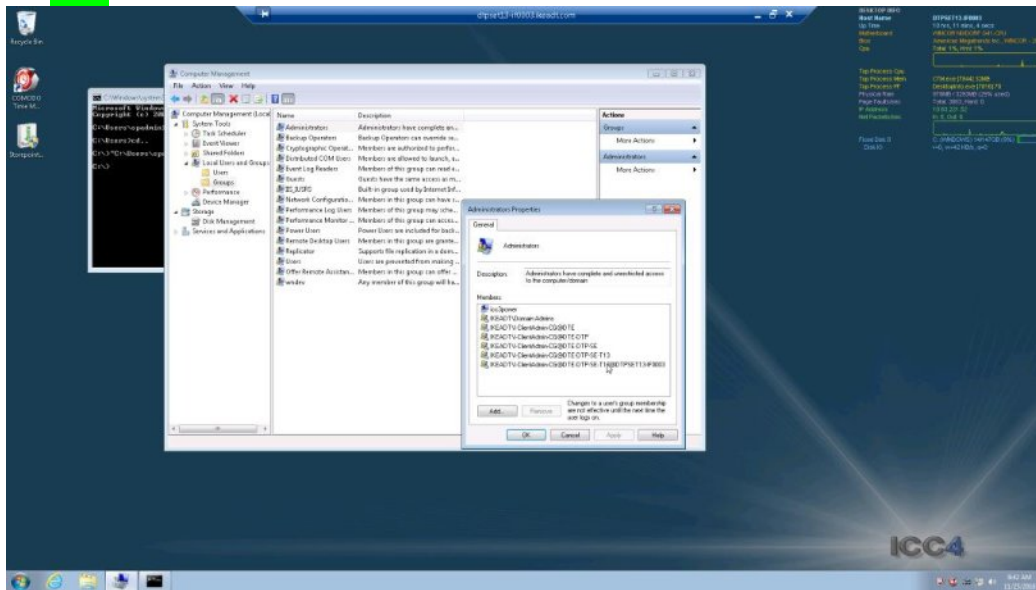

Will be verified in PROD

ent: Will be verified in PROD

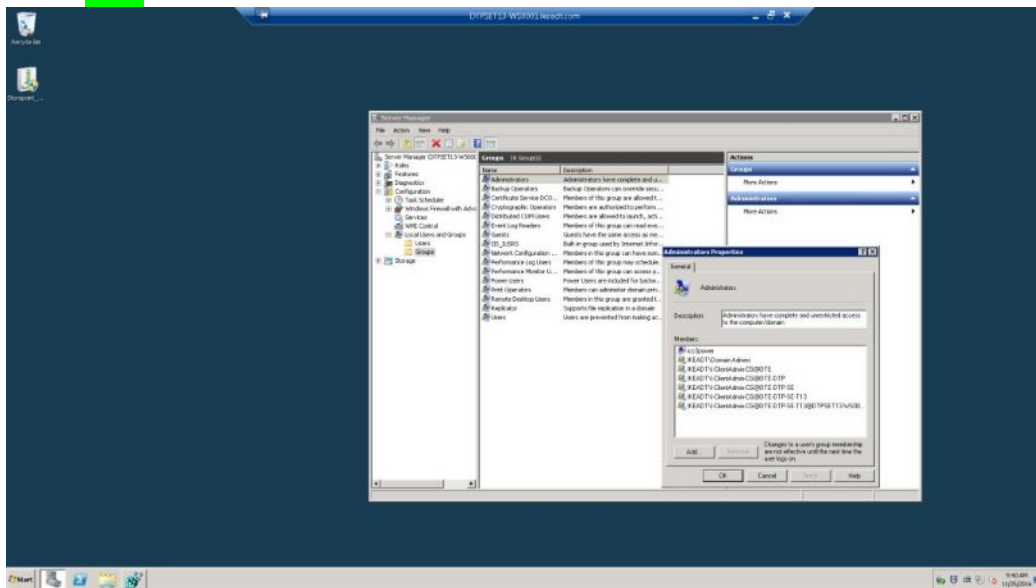

- Remove Local Admin permissions  
Run the binary Storepoint\_Delegate.exe -Remove  
Verify the group A-StorepointSupport is removed to the local group Administrators  
Server: Pass

Till: Pass

Client: Pass

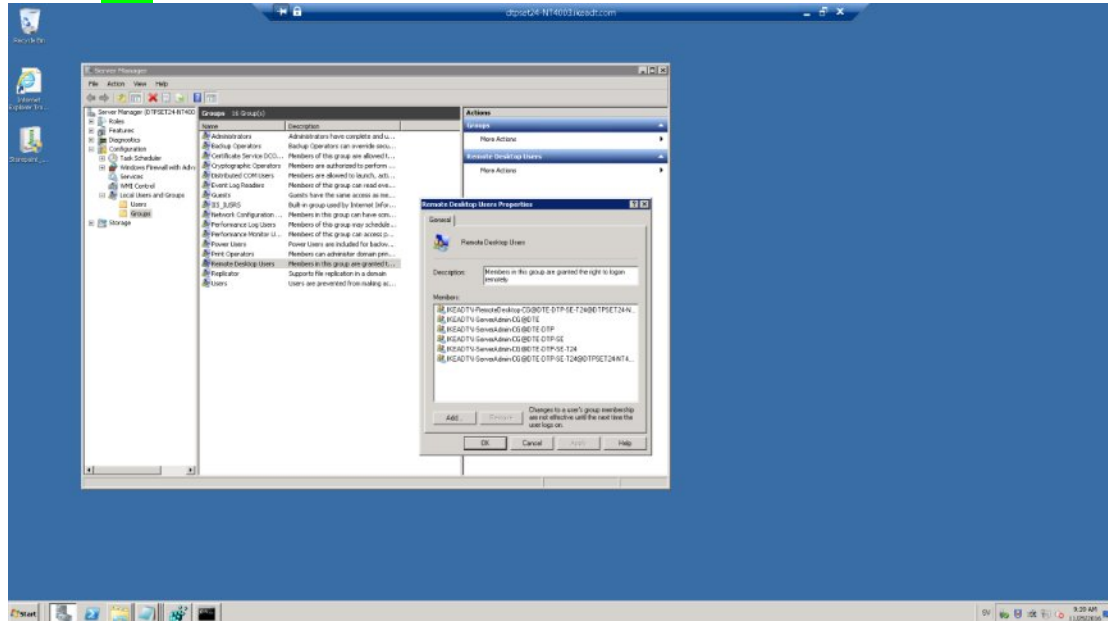

5. Remove Remote Desktop permission

Run the binary Storepoint\_Delegate.exe -Remove

Verify that any group named A-StorepointBOS-[XX] is removed from the local group Remote Desktop Users

Verify the group is only changed on -NT machines.

Server: Pass

Till: Pass

Client: Pass

Functional issues found:

Severity: 1 (High) - Must be fixed, 2 (Medium) - Fix recommended, 3 (Low) - No action needed

<what issues was found, did any manual mitigation solve the issue>

Recommendation:

Use the below machines for testing

Server: dtpset24-NT4003.ikeadt.com (Windows 7 x86, Windows 7 x64, Windows 2008 R2)

Till: dtpset13-if0003.ikeadt.com (Windows 7 x86, Windows 7 x64, Windows 2008 R2)

Client: DTPSET13-WS0001.ikeadt.com (Windows 7 x86, Windows 7 x64, Windows 2008 R2)

Credential: spadmin1/Capgemini1!

Tester:
